Eccles and technology - Raising the standards

As a long-established name in the manhole cover industry, Eccles (UK Foundries FE) have taken new technology and created an outstanding range of reinforced fibre resin solid top composite manhole covers.

Eccles' products are a huge step forward and mean peace of mind for the customer. The composite material we use allows for innovative design features and a high accuracy in manufacture, specifically produced for **Pathways and Public Areas** conforming to **B125 loading**.

Safety first

Make slips and trips a thing of the past with the Eccles range of products. Our innovative manhole covers put safety first and help avoid accidents.

Composites in action!
